### COLLABORATIVE GOVERNANCE CASE DATABASE

### Purpose of database

This database provides a collective repository for collaborative governance case studies from around the world. The mission of the repository is to foster rich but systematic medium and large-N analysis of the conditions, processes, and outcomes of collaborative governance. Researchers who contribute a case to the database may use the entire dataset for their own research purposes. Moreover, contributed cases will be cited by other researchers in their analyses.

### Key definitions and scope conditions

- All types of collaborative governance cases from all policy domains are welcome: Cases may involve only government entities, only non-government entities, or a mix of the two. Cases may represent successes or failures or something in between.
- Definition of collaboration: When two or more actors aim to constructively manage their differences in order to produce joint solutions to common challenges.
- Definition of governance: The arrangements and processes through which interdependent but operationally autonomous actors aim to formulate and achieve common goals through collective decision making.
- Definition of collaborative governance: A collective decision-making process based on more or less institutionalized interactions between two or more actors that aims to establish common ground for joint problem solving and value creation.
- Definition of a case: A set of actors collaborating on a shared issue over a specified time period within a given geographical space. The database allows contributors to chart the evolution of a collaboration over time. However, if the set of actors, the focal issue, or the geographical scope change drastically, the data may also be entered as separate but related cases.

### Instructions to contributors

The survey consists of eight thematic sections, each starting with a series of closed questions and ending with an open text question that allows you to add your qualitative insights. Please provide as much information as you feel confident in providing on the basis of your knowledge of the case.. You can select 'Don't Know' if you do not have the answer. A confidence measure at the end of each section asks you to make a self-assessment of your level of confidence in the validity and reliability of the data you have entered. The survey takes about four hours to complete one case.

Before your survey is accepted into the database, a peer researcher will review your case description to make sure it is clear and consistent. You will also be asked to check at least one case submitted by a fellow contributor. Please contact the database editors at <u>s.c.douglas@uu.nl</u> to discuss any queries you may have about the database and about potential case contributions.

### Content of survey

1.	General case information	2
2.	Main case characteristics	3
3.	Starting conditions	1
	Institutional design	
5.	Leadership	9
6.	Collaborative process	. 11
	Accountability	
8.	Outputs and outcomes of collaboration	. 15

### 1. General case information

- 1. Please provide a unique name for the case you are describing.
- 2. Please provide your name, institutional affiliation, and email address. Case author(s) Institution / University

Email address first author

- **3.** Please specify the start and termination date of this collaboration. Start of collaboration End of collaboration
- 4. Please specify the period of the collaboration covered by your research data. Note: This is not about when you collected the data, but what period your data covers.

Start of period observed	End of period observed

5. Please specify the type of data collection methods you used.

Methods	Used
Documents	
Interviews	
Observations Social	
network data	
Surveys	
Other, namely:	
-	

6. Please provide up to three weblinks to published reports, articles, or books that document this case (e.g. a peer-reviewed article or an evaluation report).

7. At which jurisdictional level did the collaboration occur? Choose more than one if necessary.Level of collaborationStart of periodMiddle of periodEnd of period

	observed	observed	observed
Local Regional National International (across borders) Supranational (UN, EU, etc.) Multi-level (collaboration between levels)			

8. In which country or region was the case situated? Pick more than one if necessary

### 2. Main case characteristics

### 9. What was the policy domain of the case? Choose more than one if required.

□Agriculture Culture/Leisure

Economy & Trade

- Environment & Climate
- □ Infrastructure & Planning
- □ Social/Employment Policy
- □ Technology & Transport
- □ Other, namely .....

Education

- □ Public Health □ Security & Public Safety

### 10. To what extent was the collaboration driven by any of the following ambitions? (1 = not at all an ambition, 5 = this was the core ambition)

Ambitions of collaboration	S		of p serv		d	Mi		e of serv		E	Ind ob:	Don't know				
	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	
Develop a plan or policy for a shared problem or societal issue																
Develop a regulatory framework for a policy domain or industry																
Create innovative solutions in existing policies, programs, practices																
Increase efficiency by lowering costs or boosting benefits																
Increase effectiveness by increasing impact of interventions																
Increase legitimacy and support among different constituents																
Organize crisis and emergency planning, response and/or recovery																
Create holding environment to contain conflict among stakeholders																
Other, namely:																

### 11. To what extent did the collaboration aim to include any of the following forms of collaborative governance? (1 = not at all an aim, 5 = this was the core aim)

governance: (1 = not at an ann, 5 = this was the core ann)																		
Purpose of collaboration	Start of period observed						Middle of period observed						End of period observed					
							00	3010	eu			00	know					
	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5			
Co-initiation: Jointly identify required																		
policies, services, or regulation																		
Co-develop: Jointly create and arrange																		
policies, services, or regulation																		
Co-production: Implement policies,																		
deliver services, or provide regulation																		
Co-assessment: Jointly monitor and																		
evaluate impact of policies, services, or																		
regulation																		

- 12. How confident do you feel the answers you provided to the questions in this section are valid, reliable, and rooted in data and observation?
- 13. Please describe in max. 600 words the (a) societal challenges and organizational issues the collaboration sought to address, (b) the stated ambitions and desired outputs and outcomes, (c) how these challenges, issues and ambitions evolved during the period observed.

### 3. Starting conditions

14. To what extent did the configuration of actors that made up the core of the collaborative process have a pre-history of mutual engagement? (1 = Very little history, 5 = Very extensive history)

		Score			Don't
1	2	3	4	5	

15. To what extent was there trust between core participants at the start of the collaboration? (1 = Very low trust 5 = Very high trust)

	-	Score	Don't know		
1	2	3	4	5	

16. How was the collaboration first initiated? Please select one option.

know

17. To what extent did the participants have more or less equal levels of resources, (e.g. knowledge, influence, skills) to bring to the collaborative process? (1 = Highly unequal, 5 = Highly equal) Start of period observed Middle of period observed End of period observed Don't know

0.6	αι σι μ	enou	ODSEIV	/eu	IVIIC		penou	00261	veu		ոս տ բ	DOLLKIOW			
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

18. To what extent were there incentives to collaborate for the participants, e.g. financial gain or increased influence? (1 = Very little incentives, 5 = Very strong incentives)

Sta	art of p	period	od observed Middle of period observed							E	nd of p	Don't know			
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

19. To what extent did the participants feel mutually dependent on each other for fulfilling their ambitions? (1 = Very low sense of interdependence, 5 = Very high sense of interdependence) Don't know Start of period observed Middle of period observed End of period observed 1 2 3 4 5 1 2 3 4 5 1 2 3 4 5

21. Please describe in max. 600 words the (a) the prehistory and past interactions of participants, (b) how the collaboration was initiated, (c) the sense of interdependence between participants and the incentives to collaborate, (d) any significant changes over time in the period observed.

### 4. Institutional design

22. How many (institutional/group) actors were involved in the collaborative process?

Start of period observed Middle of period observed End of period observed

Don't know

23. What different types of actors took part in the collaboration. Please select the backgrounds of the different participants.

Background of participants	Start of period	Middle of period	End of period	Don't
	observed	observed	observed	know
Political organizations / politicians Public organizations / civil servants Private, for-profit organizations Private, non-profit organizations Citizens / informal citizen groups				

24. To what extent were the procedural ground rules for the collaboration clearly explicated by and for the participants? (1 = Very little articulation of ground rules, 5 = Very detailed articulation) Start of period observed Middle of period observed End of period observed Don't know 2 4 5 2 5 1 2 Δ 5 1 3 1 3 Λ 3

25. To what extent were the procedural ground rules observed and applied? (1 = Very rarely applied, 5 = Almost always applied ground rules)

Sta	art of p	eriod o	observ	/ed	Mic	Idle of	period	obser	ved	E	nd of p	Don't know			
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

26. To what extent was the collaboration inclusive? (1 = Very few of the relevant and affected actors included, 5 = Almost all of the relevant and affected actors included)

St	art of p	period	observ	/ed	Mic	Idle of	period	obser	ved	E	nd of p	eriod o	observ	ed	Don't know
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

27. To what extent were the decision-making processes in the key collaborative forums transparent? (1 = Rarely clear to participants how decisions were taken, 5 = Almost always clear) Start of period observed Middle of period observed End of period observed Don't know 1 1 2 3 4 5 1 2 2 5 3 4 5 3 4

29. Please describe in max 600 words (a) the ground rules of the collaboration, (b) the inclusiveness of the collaborative forum(s), (c) the transparency of decision making within the collaborative forum(s), (d) any significant changes in the institutional architecture of collaboration over time

	5. Leadershi	р		
30. Characterize the locus of leadersh	ip roles in the colla	aborative process		
Locus of leadership	Start of period observed	Middle of period observed	End of period observed	Don't know
One lead actor A few lead actors Shared collective among all actors				

# 31. What were the backgrounds of those exercising leadership? Choose more than one if necessary.

Background of participants	Start of period	Middle of period	End of period	Don't
	observed	observed	observed	know
Political organizations / politicians Public organizations / civil servants Private, for-profit organizations Private non-profit organizations Citizens / informal citizen groups				

# 32. To what extent was the leadership effective in convening / bringing together the relevant and affected actors (1 = Highly ineffective, 5 = Highly effective)

Sta	art of p	eriod	observ	/ed	Mic	dle of	period	lobser	ved	E	nd of p	eriod o	observ	ed	Don't know
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

33. To what extent was the leadership effective in guarding the focus and integrity of the collaborative process intended in this case? (1 = Highly ineffective, 5 = Highly effective) Start of period observed Middle of period observed End of period observed Don't know 2 3 4 5 2 4 5 1 1 2 3 4 5 1 3

# 34. To what extent was the leadership effective in resolving or mitigating conflicts between actors? (1 = Highly ineffective, 5 = Highly effective)

Sta	-	eriod	observ	/ed	Mic	dle of	period	lobser	ved	E	nd of p	eriod o	bserv	ed	Don't know
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

# 35. To what extent was the leadership effective in creating and realizing concrete opportunities for creative problem-solving resolving? (1 = Highly ineffective, 5 = Highly effective)

Sta	art of p	eriod o	observ	/ed	Mic	dle of	period	obser	ved	E	nd of p	eriod o	bserv	ed	Don't know
1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	

37. Please describe in max. 600 words the (a) the form and style of leadership within the collaboration, (b) the dynamics and impact of leadership on the collaborative process (c) changes in the leadership dynamics in the period observed.
